

SmartCAM[®] ProE[®] /Creo[®] Connection[™] V2015

Experience Powerful, Flexible, Affordable...SmartCAM

Provides
Seamlessly Integrated,
Native-Format
Data Translation for
ProE/Creo Files

SmartCAM ProE/Creo Connection

SmartCAM ProE/Creo Connection[™] is an optional native-format data translator available for purchase. When installed on a system with SmartCAM, it allows users to read PTC ProE/Creo[®] part files directly into SmartCAM without the need to use intermediate file formats such as STEP, IGES or SAT Solid.

Ease of Use

Once installed, the SmartCAM ProE/Creo Connection is accessed directly via the File Open and Merge dialog boxes.

SmartCAM ProE/Creo Connection Features

SmartCAM ProE/Creo Connection:

- **Reads .PRT Files**
Reads ProE/Creo .PRT, .PRT.*, and .XPR part files from ProE version 16 through Creo 2.0.
- **Drag and Drop**
Your ProE/Creo files can be opened directly in your SmartCAM application using drag and drop.
- **Part Model Units**
Supports the metric or inch units of the solid model file.

System Requirements

No additional requirements beyond the SmartCAM base application requirements.
