SmartCAM® Solid Edge® Connection™ V2015

Experience Powerful, Flexible, Affordable...SmartCAM

Provides

Seamlessly Integrated,

Native-Format

Data Translation for

Solid Edge Files

SmartCAM Solid Edge Connection

SmartCAM Solid Edge Connection™ is an optional native-format data translator available for purchase. When installed on a system with SmartCAM, it allows users to read Solid Edge® part files directly into SmartCAM without the need to use intermediate file formats such as STEP, IGES or SAT Solid.

Ease of Use

Once installed, the SmartCAM Solid Edge Connection is accessed directly via the File Open and Merge dialog boxes.

SmartCAM Solid Edge Connection Features

SmartCAM Solid Edge Connection:

- **Reads .PAR and .PSM Files**
  Reads Solid Edge .PAR and .PSM part files created in Solid Edge versions 18 through ST6.

- **Drag and Drop**
  Your Solid Edge files can be opened directly in your SmartCAM application using drag and drop.

- **Part Model Units**
  Supports the metric or inch units of the solid model file.

System Requirements

No additional requirements beyond the SmartCAM base application requirements.
