

Predator CNC Editor for SmartCAM™ V18

Experience Powerful, Flexible, Affordable... SmartCAM

Provides CNC
machine code
editing and DNC
communication

Predator CNC Editor for SmartCAM

Predator CNC Editor for SmartCAM is an OEM version of the industry-leading standard version from Predator Software, Inc.. It is the most popular 32-bit CNC code editor available on the market, is extremely easy to use and includes many features to improve the day-to-day productivity of CNC machine tools.

Predator CNC Editor for SmartCAM is the ideal choice for the CNC editing and DNC needs of all SmartCAM users.

Shorten Your Delivery Times

Predator CNC Editor for SmartCAM provides NC editing and DNC functionality that gets your jobs done faster and shorten part delivery times.

Features

- **DNC in the Background**
Send, receive, and dripped to one machine at a time, via switch box or direct connection to any compatible CNC machine. It works in the background even while other software applications are running.
- **Full Math Operations**
Including trigonometry functions.
- **Color Highlighting**
Maximize your machining productivity with indexing tables and tombstone setups.

Discount when upgrading to the full version

Customers with current versions of SmartCAM can upgrade to the full version of Predator CNC Editor at 20% discount off the standard price.

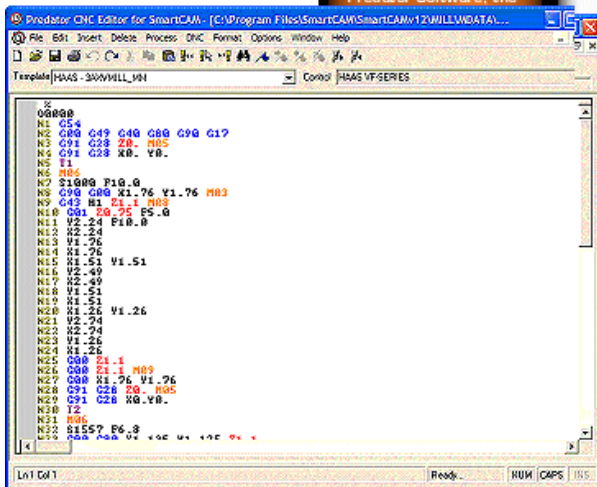

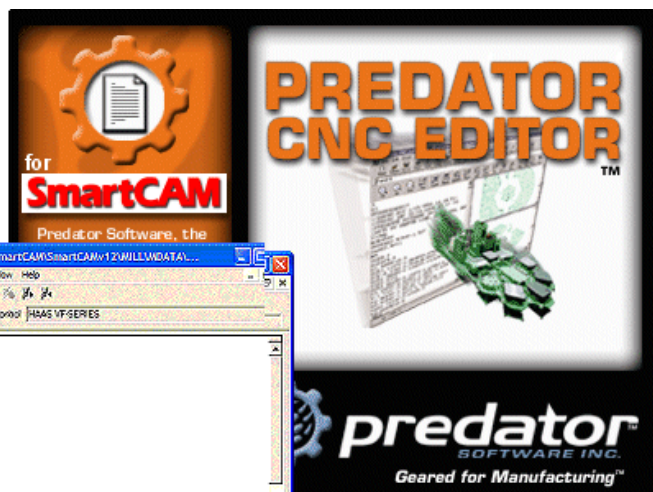

Additional functionality in the full version includes:

- **File Compare**
Predator CNC Editor includes a side by side file compare which identifies each G and M code difference and fixes them with a single click of the mouse. Reporting options simplify the process of integrating shop floor edits with a master CNC program.
- **Graphical Verification & Backplotting**
Graphically verify CNC code by quickly backplotting a wire frame model of any CNC program in a true 3D environment. Supports 2-, 3-, 4- and 5- axis mills, routers, waterjets, and lasers, as well as 2-axis lathes.
- **DNC Restart**
Automatically re-creates the CNC program from any point.
- **Extended COM Ports**
- **Unlimited Undo and Redo**
